

## **Dr. Kim Kubiack, CEO & Co-Founder DentalTwin**

Dr. Kim Kubiack is a dentist, entrepreneur, and leading visionary in AI-driven prosthodontics and implantology. With more than two decades of clinical experience, she brings rare depth to her work – uniting clinical expertise, strategic practise management, and a sophisticated understanding of AI engineering and digital tranformation in dentistry.

As Founder and CEO of DentalTwin, Dr. Kubiack is redefining digital dental workflows. Under her leadership, DentalTwin develops intelligent, AI-driven solutions that optimize complex workflows, and align clinical excellence with significantly increased productivity and efficiency in daily practice.

A self-described data enthusiast and passionate advocate of AI, Dr. Kubiack is driven by a clear vision: a form of dentistry in which automation liberates professionals from repetitive tasks, allowing practices and laboratories to focus fully on patients and quality. She firmly believes that those who succeed in fully automating the comprehensive cataloging of missing teeth and the associated data flows are not merely optimizing workflows—they are shaping the future of dental prosthetics.
